

ANNUAL REPORT

Annual Report 2024

Aurelia Grid Technologies plc — powering the electrified grid

Entity	Aurelia Grid Technologies plc	Listing	LSE: AURG
Reporting period	FY2024 (year ended 31 December 2024)	Sector	Grid Infrastructure
Registered	England & Wales (No. 09421887)	Headquarters	Manchester, United Kingdom
Independent auditor	Hartley & Vane LLP	Headcount	6,420

Financial highlights

\$1,284.6m	+12.5%	\$238.7m	\$2.37	\$1,910m
Group revenue	Revenue growth YoY	Adjusted EBITDA	Diluted EPS	Order backlog

Chair & Chief Executive's statement

2024 was a year of disciplined, profitable growth for Aurelia Grid Technologies. Group revenue rose 12.5% to \$1,284.6m (2023: \$1,142.3m), with adjusted EBITDA of \$238.7m representing an EBITDA margin of 18.6%, up from 17.4% a year earlier. Demand for grid modernisation, interconnection capacity and behind-the-meter storage remained the principal structural tailwind across all three of our reporting segments.

Net income attributable to shareholders increased to \$118.4m (2023: \$96.8m), and diluted earnings per share rose to \$2.37 from \$1.95. The Board is recommending a final dividend that brings the full-year distribution to \$0.62 per share, a 14.8% increase. Order backlog reached a record \$1,910m at year end, providing strong forward revenue visibility into 2026.

Group performance at a glance

\$m, unless stated	FY2024	FY2023	FY2022	YoY
Revenue	1,284.6	1,142.3	1,021.7	+12.5%
Gross profit	462.5	404.4	356.6	+14.4%
Adjusted EBITDA	238.7	198.4	168.9	+20.3%
Operating profit (EBIT)	176.2	148.9	121.4	+18.3%
Net income	118.4	96.8	78.2	+22.3%
Diluted EPS (\$)	2.37	1.95	1.58	+21.5%
Free cash flow	105.9	84.1	63.7	+25.9%
Net debt / EBITDA (x)	2.30	2.78	3.05	−0.48x

Adjusted EBITDA excludes non-recurring restructuring charges of \$7.4m and share-based payment expense of \$11.2m. A full reconciliation is provided in the consolidated financial statements.

Segment review

Aurelia reports across three operating segments. Each serves a distinct part of the electricity value chain, from primary grid hardware through to metering software.

Segment	Revenue FY2024 (\$m)	Share	Adj. EBITDA margin	YoY growth
Grid Infrastructure	612.4	47.7%	19.8%	+10.1%
Energy Storage Systems	438.7	34.1%	16.9%	+18.4%
Smart Metering & Software	233.5	18.2%	21.3%	+8.7%
Group total	1,284.6	100.0%	18.6%	+12.5%

Grid Infrastructure

The Grid Infrastructure segment generated revenue of \$612.4m, our largest business by scale. Growth was driven by transmission substation refurbishment programmes in North America and Europe, and by a multi-year framework with two regulated network operators. Segment book-to-bill remained above 1.1x throughout the year.

Energy Storage Systems

Energy Storage Systems was the fastest-growing segment, with revenue of \$438.7m, up 18.4%. Utility-scale battery deployment and a strengthening pipeline of behind-the-meter commercial projects supported the result. Margin remains below group average as the segment scales, but unit economics improved through the year on procurement efficiencies.

Smart Metering & Software

Smart Metering & Software contributed revenue of \$233.5m at the highest segment margin (21.3%), reflecting a growing share of recurring software and analytics revenue. Annual recurring revenue (ARR) within this segment reached \$96.4m, up 23%.

Revenue by geography

Region	Revenue FY2024 (\$m)	Share of group	YoY growth
North America	578.1	45.0%	+14.2%
Europe, Middle East & Africa	462.5	36.0%	+9.8%
Asia-Pacific	244.0	19.0%	+15.6%
Group total	1,284.6	100.0%	+12.5%

Strategy and outlook

Our strategy rests on three pillars: deepen our position in regulated grid hardware, scale energy storage to a structurally higher-margin run-rate, and grow recurring software revenue to improve earnings quality. Capital allocation remains disciplined, prioritising organic investment and progressive dividends while maintaining net leverage below 2.5x.

- **Grow the regulated base.** Expand framework agreements with network operators to lock in multi-year, inflation-linked revenue.
- **Scale storage profitably.** Target a 19–20% segment EBITDA margin by 2026 through platform standardisation and procurement scale.
- **Grow recurring revenue.** Lift group ARR towards \$140m by 2026, improving cash conversion and resilience.
- **Maintain balance-sheet discipline.** Hold net debt / EBITDA in a 2.0–2.5x range across the cycle.

FY2025 guidance

The Board guides to organic revenue growth of 8–11%, an adjusted EBITDA margin of 18.5–19.5%, and free cash flow conversion above 55% of adjusted EBITDA, subject to macroeconomic and supply-chain conditions. Capital expenditure is expected in the range \$100–115m.

Governance summary

The Board comprises nine directors, of whom six are independent non-executive directors. The Audit Committee, Risk Committee and Remuneration Committee are each chaired by an independent non-executive director. During 2024 the Board reviewed the Group's principal risks, approved the enterprise risk appetite statement, and oversaw the integration of climate-related financial disclosures consistent with TCFD recommendations.

Governance metric	FY2024	FY2023
Board independence	67%	63%
Female Board representation	44%	38%
Audit Committee meetings held	7	6
Material control weaknesses reported	0	0
Scope 1 & 2 emissions (ktCO2e)	41.6	46.2
