TEMPLATE USAGE

This is a reusable **template (scaffold)**. Section IDs, headings and section order are **locked** and must not change. Tokens in `{{double_braces}}` are **slots** filled at generation from evidence or input — preserved verbatim until filled. Italic boilerplate stays verbatim. This template carries no facts or client content and is not a source of fact.

RISK-01

Approach

[BOILERPLATE] Risks are scored on a 1–5 scale for likelihood and impact. The residual rating reflects the position after mitigating controls. Risks rated above appetite are escalated. This methodology statement is fixed boilerplate.

Risk heat map (scaffold)

[BOILERPLATE] The 5×5 grid below is a fixed scaffold. Risk IDs from the register are plotted into cells at their likelihood × impact position at generation.
